**FOR IMMEDIATE RELEASE**

**July 26, 2017**

## **CLEVELAND STREET RECONSTRUCTION MAY BEGIN ON MONDAY**

*Work to be completed in four phases to allow access to businesses*

**MUSCATINE, Iowa** – The Cleveland Street Construction Project will begin as early as Monday, July 31, 2017, according to City Engineer Jim Edmond. The project will remove and replace existing concrete on Cleveland Street from Park Avenue to 2nd Avenue.

All American Concrete of West Liberty, Iowa, was the successful low bidder at \$403,889.10 and the contract with the City of Muscatine was approved by the Muscatine City Council on July 20, 2017.

The project will be completed in four phases to allow access to businesses during construction with the entire project estimated to be completed by September 30, 2017.

While it is the intent of the contractor and the City of Muscatine to maintain access to businesses at all times during the reconstruction project, some delays may occur. The public is asked to be patient and plan alternate routes to businesses on Cleveland Street if needed during the project.
