SYCAMORE-7TH STREET INTERSECTION TO CLOSE TUESDAY

West Hill Sewer Separation Project ready to move into intersection on May 8

MUSCATINE, Iowa – KMA Excavating is approaching the completion of the first block of work in Phase 4A of the West Hill Sewer Separation Project. The City of Muscatine will now close the intersection at Sycamore and 7th Street starting at 7 a.m. Tuesday, May 8, to allow KMA to continue the project into the 100 block of East 7th Street.

The plan is for KMA Excavating to complete the first two blocks and move into the third block of the project before KE Flatwork begins preparing the 100 and 200 blocks of East 7th for repaving. An exact time schedule for that work will be released closer to the start date of the repaving work.

No parking is allowed in the 200 or 100 block of East 7th Street and property owners will be notified when they will be allowed to park on the street.
