MUSSER STREET CLOSURE EXTENDED TO TUESDAY

Weather delays postpone reopening of Musser Street until June 19

MUSCATINE Iowa – Thursday's rain delayed the pouring of concrete on Musser Street and has also delayed the opening of the street to traffic. According to the contractor, Sulzco, the concrete plant is booked through the weekend and they will not be able to have concrete until Monday, June 18, at the earliest.

A new water and electrical service was installed at 1110 Musser Street that necessitated the closure of Musser Street at that location. The water main is located on the south shoulder of Musser Street and MPW required the closure to install a six-inch tap on the water main and run the pipe across the street.

The closure may be extended past Tuesday depending on the weather and concrete availability.
