**WATER POLLUTION CONTROL****MEMORANDUM**

**To:** Gregg Mandsager, City Administrator

**CC:** Nancy Lueck, Finance Director  
Fran Donelson, Secretary

**From:** Jon Koch, Director WPCP

**Date:** March 31, 2015

**Re:** Maintenance Software Purchase

**INTRODUCTION:** New maintenance software has been researched and identified to replace the Tool Time maintenance software. The Antero Maintenance Data and Operator 10 software by Allmax Software, Inc. is the only program available to link maintenance data to operational process control data. The program including current data conversion and training is \$10,197.00. \$11,000 was to be budgeted for this item in 2015/2016. Surplus in the 14/15 budget and possible loss of the current program due to the expired Windows XP operating system has moved this purchase up in priority.

**BACKGROUND:** The maintenance department uses a computer program called Tool Time to generate work orders and track all preventative and corrective maintenance on thousands of pieces of equipment at the treatment plant and the 21 lift stations. This software accurately tracks maintenance data, allowing staff to streamline the maintenance program to save time, effort and money. These maintenance programs protect expensive asset replacement requirements and ensures continuous operation of all equipment.

After researching several programs, none were found that would link maintenance and operation of a wastewater facility. Most programs of this type are factory and production focused and run between \$80,000 and \$100,000. This critical yet outdated component of the maintenance department will not operate on Windows 7 or higher, requiring an outdated Windows XP to remain on line. Windows XP is no longer supported by Microsoft and no updates are currently available for Tool Time.

**RECOMMENDATION/RATIONALE:** Staff recommends the purchase of the Antero Maintenance Data and Operator 10 software from Allmax Software, Inc. for \$10,197.00.
