Seneca Environmental would like to close 5th Street between Cedar and Sycamore at 6:00 PM on either next Monday or Tuesday in order to use a hydrant on the opposite side of the street to fill the fuel tanks that will be installed for Kum & Go to test them. The closure should only be for about 4 hours and it will be in the evening so hopefully it won't be too much of an inconvenience.

Do you see an issue with this? Do we need council approval for this short of a closure?

Brian Stineman
