RE: Request to Restrict On-Street Parking on the South Side of Hershey Avenue From Charles Street to the End of the Pavement Taper at 2216 Hershey.

---

### INTRODUCTION:

Currently the pavement is not wide enough to accommodate parking on the south side of Hershey Avenue between Charles Street and the point where the pavement widens near 2216 Hershey. However, cars continue to park in this location with parts of them impeding into the travel lane of Hershey Avenue.

### BACKGROUND:

This item was discussed by the "Traffic Committee" on August 28, 2019. The group feels that restricting parking on the taper portion of the pavement will improve safety for people parking their cars and driving on this section of Hershey Avenue. We propose to extend the no parking area approximately eighty-five feet to prevent cars from parking with parts of them in the travel lane.

### RECOMMENDATION/RATIONALE:

Staff recommends that council approve this request to eliminate on-street parking on south side of Hershey Avenue from the corner of Charles Street to a point approximately 85 feet east, in front of 2216 Hershey. No parking signs will be posted as soon as possible after approval.
