ALLIANT ENERGY REPLACING SOME GAS METERS

“Q3” contracted to replace select gas meters for automated meter reading

MUSCATINE, Iowa – Alliant Energy is in the process of moving towards automated meter reading with part of that process being the replacement of older meters that cannot be automated with new meters that can be automated. Alliant Energy has contracted with Q3 Contracting to replace the meters.

Homeowners who have a meter that will be replaced should receive a letter from Q3 stating the time and date that the company will be in the area to replace their meter. The letter will also provide details on how the homeowner can contact Alliant Energy or Q3 with any questions that they may have.

Although Q3 and Alliant do not need to secure a permit from the City of Muscatine for the replacement of the gas meters, homeowners are advised to ask for proper identification and to ask any questions they may have before the work is performed.

For more information, contact Alliant Energy at 1-800-ALLIANT (800-285-4268).
