**FOR IMMEDIATE RELEASE
DECEMBER 16, 2022**

DRIVERS TAKE NOTICE - TRAFFIC SIGNAL ACTIVATED

Traffic signal at Grandview-Oregon/Warren intersection now in full operation mode

MUSCATINE, Iowa – The traffic signal at the Grandview-Oregon/Warren intersection is now in full operation mode according to Muscatine Power and Water (MPW) who maintains the traffic signals in Muscatine.

The traffic signal had been in flashing red mode for the past several months as work on the Grandview Avenue Reconstruction Project continued. After the intersection was striped, MPW began working to install the timing system for the signals. The timing system has been installed and tested with today's (Dec. 16) activation culminating the effort to return the intersection to normal operation.

Drivers are advised to pay attention and obey the traffic signals as they are now in full operation.
