Re: Request approval for purchase of a one ton truck for Refuse Collection

Introduction: During the 2017/2018 budget process, Refuse Collection was granted \$34,000.00 for the purchase of a used, one ton truck with a liftgate. This vehicle is used daily for curbside pickup and delivery of refuse and recycling carts. We have three trucks which rotate for this service. They are model years: 1999, 2004, and 2007. We will be trading the 1999 truck. As of early January it had 140,669 miles. The body is badly rusted. The liftgate will be transferred to another truck.

The request for proposal was posted on the City website in early January 2018, bids were due on January 26, 2018. We requested a full size, 1 ton, 2 wheel drive pickup with hydraulic dump body, dual rear wheels, rear lift gate, stainless steel dump body and regular 2 door cab. We received ten (10) vehicle bids from five (5) different vendors.

The low bid for a Dodge Ram truck came from Deery, Iowa City for \$35,806.00. The highest bid was \$42,305.00 with the eight remaining bids in between. All bids met the specifications.

Recommendation: Staff recommends purchase of the 2018 Dodge Ram one ton truck with Crysteel E-Series Tipper, Crysteel Lo-Boy Hoist, Hydraulic Tommy Gate G2-92-1650 LD lift, and 12' stainless dump bed from Deery of Iowa City for \$38,006.00 minus \$2200.00 for trade-in of our truck #400 for a final price of \$35,806.00. The Refuse Collection budget can absorb the additional \$1806.00.
